

About Tishman Construction

Overview

Tishman Construction is a construction management firm headquartered in New York City with operating units in Newark, Boston, Chicago, Las Vegas, Los Angeles, Philadelphia, Washington, DC, and Abu Dhabi.

We provide a wide range of construction and construction-related services for projects of varying scope, budget, schedule and complexity. Tishman Construction's services include:

- Construction Manager as Agent
- Construction Manager at Risk
- Owner's Representative
- Sustainability
- Insurance Programs

Our goal is to help each of our clients realize their vision. We do this by managing the complexity inherent in construction projects and becoming a key part of the project team.

Experience

Our experience includes projects from various sectors, including arts and culture, commercial, convention centers, education, gaming, government, healthcare, hospitality, residential, retail, sports and leisure, technology and transportation. Our project executives and resource group team leaders have an average of more than 20 years in the industry.

Some of Tishman Construction's current projects include:

- One World Trade Center in New York City for the Port Authority of New York & New Jersey
- US Department of Homeland Security Headquarters - Phase 1 in Washington, DC
- Philadelphia Convention Center Expansion
- Chicago Public Schools Capital Improvement Program
- 175 Greenwich Street - Tower 3 and 150 Greenwich Street - Tower 4 at World Trade Center for Silverstein Properties
- World Trade Center Transportation Hub in New York City
- Anaheim Regional Transportation Intermodal Center for The Orange County Transportation Authority and the City of Anaheim

Affiliates

Tishman Technologies

Tishman Technologies offers comprehensive construction management, consulting, site selection and project management services for mission critical space. Since its inception, Tishman Technologies has consulted for, built and/or renovated more than 21 million square feet of mission critical space and related infrastructure for a diverse group of clients in the public and private sectors.

Tishman Interiors

Tishman Interiors specializes in working within active building environments and delivering projects with unique scheduling and/or spatial parameters. Aside from traditional corporate interior build-outs, Tishman Interiors also manages building-wide renovation and modernization projects, recladding, building system upgrades, specialized renovation and refurbishment projects within landmark and/or historic buildings, and large, multi-site capital programs for both the public and private sector.

Tishman Sustainability

Tishman Sustainability offers consulting services to clients navigating the complex decision-making process inherent in building green and targeting a LEED® or Green Globes certification. Tishman Construction has built, or is currently building, over 50 million square feet of LEED certified projects. With many LEED accredited professionals on staff and numerous projects currently underway striving for LEED certification in major cities across the country, Tishman Sustainability specializes in simplifying and managing the complexities that come with sustainable construction.
